HOUSTON/WILLIAM P. HOBBY (HOU)

**Hot Spot description on back side.**

## Houston/William P. Hobby (HOU)

**Hot Spots**

**HOT1** - Taxiway **Delta** crosses 3 Runways in close proximity to each other. The Hold Short Line for Runway **17** and Runway **12R** is the same. Pilots proceeding westbound on Delta must use caution after crossing Runway **12L** to ensure they do not cross the Hold Short Line for Runways **17** and **12R**. Pilots need to confirm they line up on the correct Runway when given either "Position & Hold" or a "Departure Clearance."

**HOT2** – Pilots must remain ALERT to their location on Taxiway **Golf**. Numerous pilot deviations (PD) have occurred at this location. After a pilot is given the instruction "Runway **12R** taxi via **Golf**," they inadvertently cross the Hold Short Line for Runway **12R**.

**HOT3** - Use Caution; ensure you are lined up on the correct Runway.
